

Care Management Plan 2016 – 2017

Hanoi, Vietnam

About the Care Management Plans

This document explains the bigger picture of our projects in Vietnam and how the combined daily tasks of all of our volunteers help us to achieve long term goals. By following Task Lists, our volunteers work towards our Goals, through which we contribute to our Care Programme Mission which combined with our other projects, helps us to reach our Company Mission.

Here we will lay out the priorities, resources, monitoring tools and evaluation systems used to make our ambition a reality.

Our Resources

<p>Human Resources</p> <ul style="list-style-type: none"> • Volunteers are of course our primary resource to achieve our goals. We welcome over 3,000 Care volunteers per year globally. • The staff at our placements support and facilitate our actions • Over 600 Projects Abroad staff members provide the structure we need for worthwhile projects. 	<p>Physical Resources</p> <ul style="list-style-type: none"> • With over 50 Projects Abroad offices worldwide, there is always somewhere for volunteers to work together and share experiences • We provide all necessary placement materials and regularly construct and renovate care centres. 	<p>Online Resources</p> <ul style="list-style-type: none"> • Our Volunteer Resources Database shares thousands of ideas among our community • The Care Database is used to track our projects all over the world • Personalised MyProjectsAbroad webpages prepare each volunteer for their Care project.
<p>Financial Resources</p> <ul style="list-style-type: none"> • Funds for all of Projects Abroad's work come solely from volunteer placement fees. These are distributed via monthly budgets, to ensure fair allocation of funds for each destination. • Occasionally the Projects Abroad community may send donations directly for a specific placement or project. 	<p>Intangible Resources</p> <ul style="list-style-type: none"> • The good reputation of volunteers in local communities is what makes our work possible. This reputation has been earned over years of dedicated volunteer contribution. • This is supported by the combined knowledge of our extensive staff network. 	

Our Care Management Plan Goals in Vietnam for 2016-2017

The following goals have been selected from a list of nine by our local staff and partners. Each placement may be working on one or more of these goals. We try to put volunteers in the most suitable placement based on what we know about them. We provide workshops, training, volunteer guides and checklists for each of these goals.

Improve Hygiene Levels of the Children

Access to hygiene and adequate sanitation has long been linked to community health, education and overall development. Teaching children good hygiene practices from an early age is key to improving their opportunities later in life. Projects Abroad volunteers aim to measure and improve hygiene standards over time through our Hygiene Checklist. We educate and run activities to promote proper hygiene, with the aim of improving overall health in these care centres.

Raise Awareness of Healthy Living

This goal is one of our more diverse. Healthy Living, the Environment and Family Planning are three topics which can often be left out of the curriculum in developing countries. This is unfortunate as adequate education in these areas can directly alleviate some issues surrounding poverty. Healthy Living indicates a lifestyle of proper nutrition, exercise and medical care. Volunteers can contribute both directly and indirectly to this goal through a health programme of daily routines and activities.

Increase Emotional Care and Support to Each Child

Emotional support is crucial to development. Our personality, sense of self, our confidence and our ambitions are all built on a foundation of care and support we receive as children. Many children in care centres have come from situations of abuse or neglect, or have never had family to care for them. These children have complex emotional needs that the under-resourced care centres do not have time to address.

Improve the Level of Stimulation of each Child

It has been shown that a lack of stimulation in early years, particularly in situations of poverty or neglect, can lead to delayed development later in life. It is vital that we are using our time, as a community of volunteers, to improve the sensory, motor, emotional and cognitive development of the children we work with. To improve the children's attention span, volunteers engage with them in regular games and activities, offering equal attention to the children with disabilities at care centres, by encouraging mental, physical and social exercises.

Improve the Quality of Life for Those Living with Disabilities

Vietnam has a large disabled population due to war and disease. Resources available to people living with disabilities, as well as opportunities when it comes to finding work, still remain very limited. Our volunteers help to organise local vocational trainings in crafts, cooking and pastry-making, as well as offer specialised training for caretakers working with children with disabilities.

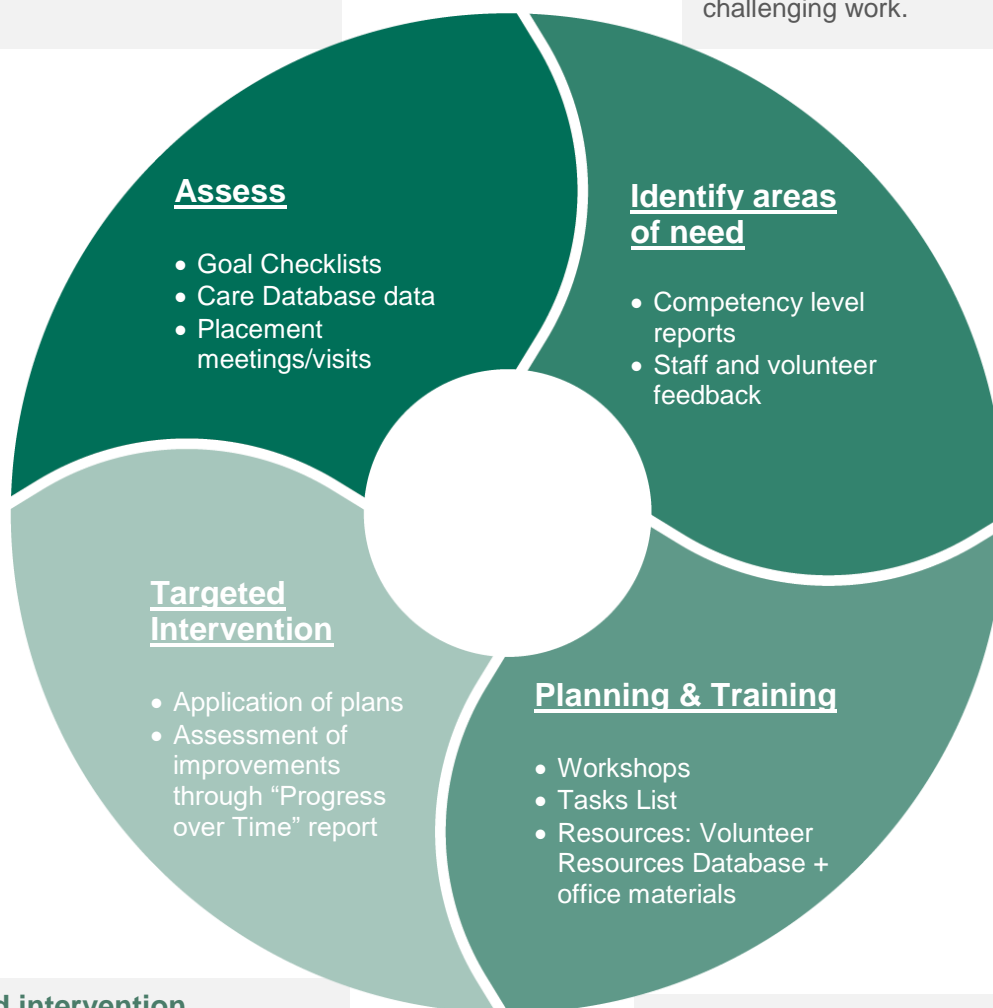

How we achieve our goals

Assessment

Through specially designed checklists, our volunteers assess the status of each child or placements in areas related to English, Numeracy, Hygiene and more on a daily basis. This information is uploaded to the Care Database through regular workshops with our team.

Identify areas of need

Through our reporting system we can identify the areas that most need human or material resources. This helps volunteers to know which children are struggling so that they may conduct remedial classes; and also which students are ahead, so that they are given more challenging work.

Targeted intervention

Through our steady stream of volunteers year round, we are continuously targeting the areas of need determined by our checklists. Although a 4 week volunteer might not see a tangible difference in the time they are there, we are able to show that over longer time frames each and every volunteer contributes to long-term, sustainable impact.

Planning and Training

Based on the areas of need we create Task Lists, workshops and community days to direct our impact to where it is most needed. Resources are designed by volunteers and these are shared on the Volunteer Resources Database.
